

Sister City Agreement

The City of Revere and Date City have created deep ties through a youth exchange program that has run since 1994.

Revere and Date now enter in to a sister city agreement on the basis of this cordial relationship that both cities have built, in order to promote the development of mutual understanding and friendship.

Both cities will proactively promote education, culture, and tourism, as well as appreciation for each city's traditions and culture.

We have confidence that this agreement will strengthen the ties between our two communities, and further the happiness and prosperity of all our residents.

This agreement is created in duplicate in English and Japanese languages, both texts being equally authoritative and effective upon the date of signing.
